Figure 2.1. Text-printing program

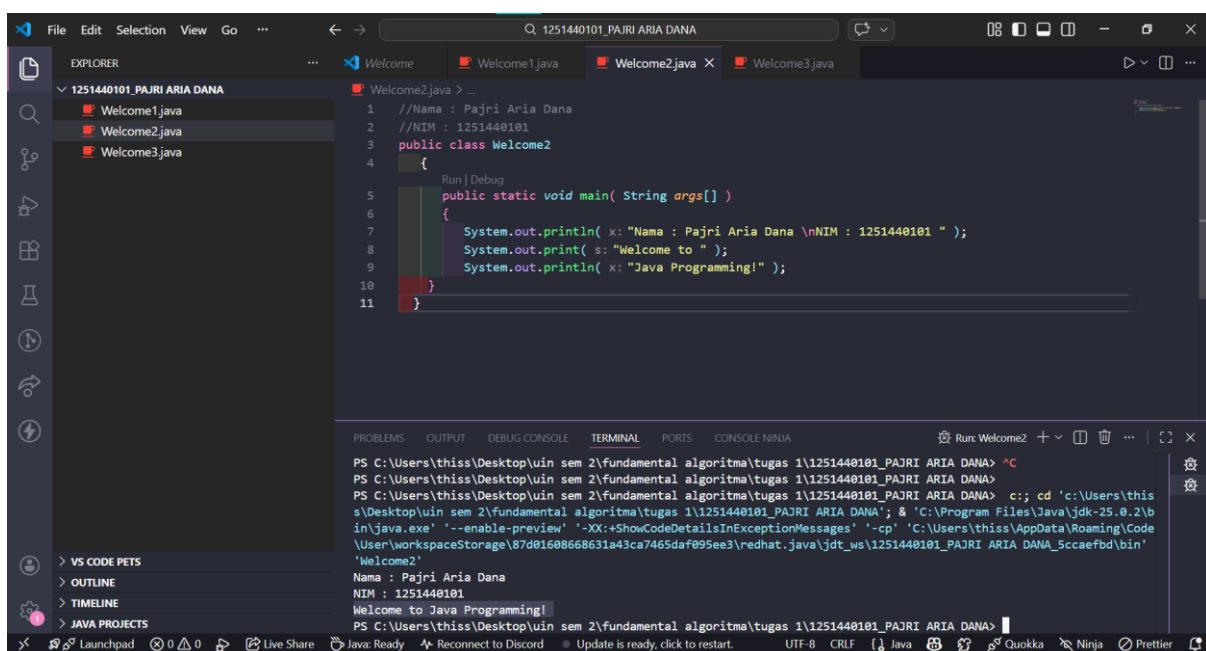

The screenshot shows the Visual Studio Code editor with a project named '1251440101_PAJRI ARIA DANA'. The Explorer panel on the left shows three files: 'Welcome1.java', 'Welcome2.java', and 'Welcome3.java'. The main editor window displays 'Welcome1.java' with the following code:

```
1 //Nama : Pajri Aria Dana
2 //NIM : 1251440101
3 public class Welcome1
4 {
5     public static void main( String args[] )
6     {
7         System.out.println( x: "Nama : Pajri Aria Dana \nNIM : 1251440101 " );
8         System.out.println( x: "Welcome to Java Programming!" );
9     }
10 }
```

The Run and Debug panel at the bottom shows the output of the program:

```

Figure 2.3. Printing a line of text with multiple statements

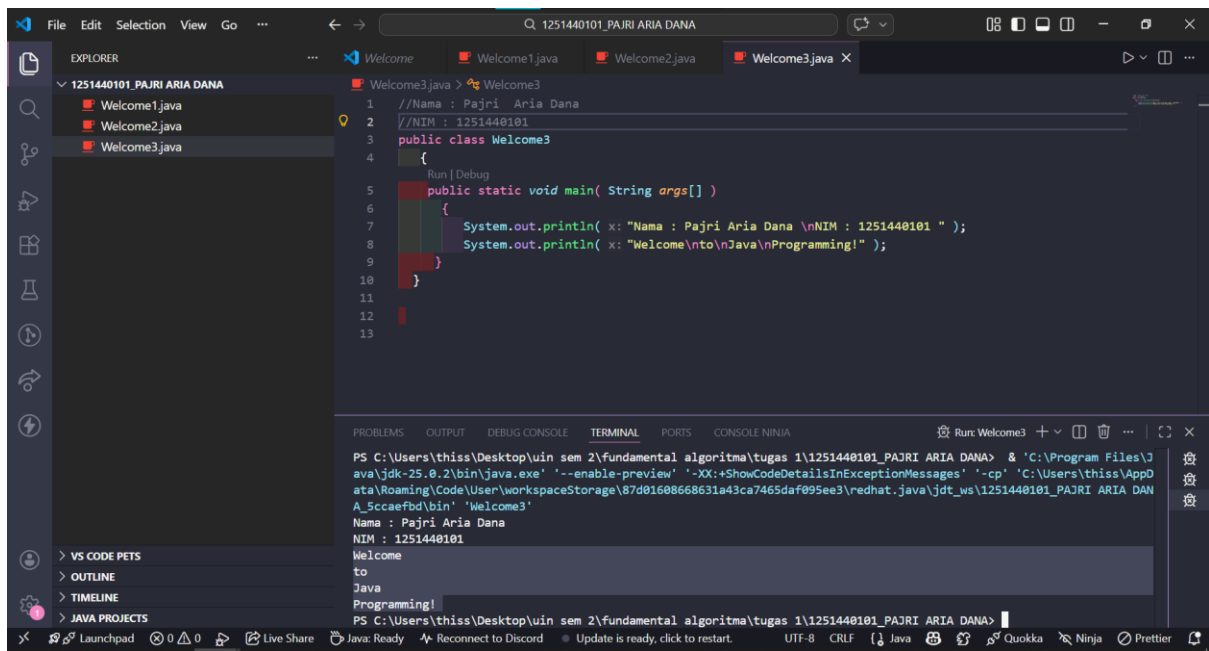

The screenshot shows the Visual Studio Code editor with the same project. The Explorer panel shows the same three files. The main editor window displays 'Welcome2.java' with the following code:

```
1 //Nama : Pajri Aria Dana
2 //NIM : 1251440101
3 public class Welcome2
4 {
5     public static void main( String args[] )
6     {
7         System.out.println( x: "Nama : Pajri Aria Dana \nNIM : 1251440101 " );
8         System.out.print( s: "Welcome to " );
9         System.out.println( x: "Java Programming!" );
10     }

Figure 2.4. Printing multiple lines of text with a single statement.

The screenshot shows the Visual Studio Code editor with a Java project named "1251440101_PAJRI ARIA DANA". The Explorer sidebar on the left shows the project structure with files "Welcome1.java", "Welcome2.java", and "Welcome3.java". The main editor window displays the code for "Welcome3.java". The code defines a public class "Welcome3" with a main method that prints two lines of text using a single `println` statement with a multi-line string.

```
1 //Nama : Pajri Aria Dana
2 //NIM : 1251440101
3 public class Welcome3
4 {
5     public static void main( String args[] )
6     {
7         System.out.println( x: "Nama : Pajri Aria Dana \nNIM : 1251440101 " );
8         System.out.println( x: "Welcome\nto\nJava\nProgramming!" );
9     }
10 }

```

The bottom panel shows the TERMINAL output, which displays the command to run the program and the resulting output:
